

Hampus Borg

Student

Hello,

My name is Hampus Borg, and I am a 27-year-old ambitious individual currently immersed in studies as a Java/Javascript Fullstack Developer at STI - Stockholm Technical Institute. The transition into the programming world marks a new phase in my career, a change that I embrace with full enthusiasm. It is with joy and curiosity that I delve deeper into this education, aiming to translate my passion for coding into a rewarding professional journey.

After careful consideration, I have identified XXX as the perfect place for me to achieve my goals and grow as a developer. I am not just seeking a position but an opportunity to integrate into your work culture and benefit from real, hands-on experience that complements my studies.

My work approach is characterized by precision and positivity. I am confident that my ability to quickly learn new things, coupled with my social nature and encouraging attitude, will make me a valuable asset to your team. Previous experiences in diverse work environments have provided me with insights into being a collaborative colleague and an adaptable team player.

In past roles, I have developed the skills to be responsible and resilient while maintaining effective communication and professionalism in all situations. I understand the importance of thriving in the workplace and look forward to contributing to a positive work environment at XXX.

I am available for further discussion via email, phone, and on LinkedIn/Github throughout the week. I am eager to discuss how my skills and ambitions can contribute to XXX and how I can grow as a developer within your organization.

Thank you for taking the time to consider my application. I look forward to hearing from you soon.

Best regards,

Hampus Borg
